

LENIN MIRANDA

Full Stack Software Engineer | AI Integrations | React · NestJS · PostgreSQL
Lenin9073@gmail.com • (725) 772-9492 • GitHub • LinkedIn • Portfolio

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend & APIs: Node.js, NestJS, Express.js, REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Supabase

Integrations: Twilio, ElevenLabs, SendGrid, OAuth, webhooks, SIP/WhatsApp

Cloud & Tools: AWS, Docker, GitHub, CI/CD, Postman, Vercel

Engineering: Authentication, validation, debugging, incident response, Agile/SDLC

WORK EXPERIENCE

Stealth Startup - Remote · Part-time Contractor

Mar 2026 - Present

Full Stack Software Engineer

- Built production AI-powered communication workflows and NestJS services integrating ElevenLabs, Twilio, WhatsApp/SIP routing, webhooks, and external APIs.
- Automated onboarding, scheduling, confirmations, and notification workflows, reducing manual setup and improving client reliability.
- Resolved 20+ production incidents across React UI, REST APIs, Asterisk/SIP routing, permissions, and external service failures.
- Shipped billing v1 with payment-cycle tracking, status webhooks, validation, retries, and service-level error handling.

Marketing.com - Las Vegas, NV

Jan 2024 - Nov 2025

Data Automation Specialist

- Built Python automation processing 100K+ daily records, cutting manual data preparation time by 70% across production workflows.
- Created SQL and regex validation pipelines that standardized addresses and maintained 99% data accuracy at production scale.
- Reduced recurring data errors by 15% through normalization, exception handling, quality checks, and reusable processing rules.
- Partnered with production teams to troubleshoot malformed files, document edge cases, and improve reliability of daily deliverables.

TripleTen Externship - Remote

Sep 2025 - Oct 2025

Backend Engineer

- Built KeystoneJS and GraphQL workflows for waitlists, invitations, role-based access, validation, and Google OAuth authentication.
- Integrated MySQL and SendGrid to manage user lifecycle events, CSV imports, invitation delivery, and transactional email workflows.
- Shipped 4 production workflows in a six-week Agile externship with documented schemas, API contracts, and GitHub-based reviews.
- Collaborated with product and frontend teammates to clarify acceptance criteria, review changes, and deliver lifecycle features on schedule.

Odontools - Remote · Contractor

Aug 2025 - Dec 2025

Full Stack Software Engineer

- Built a React and Express commerce platform supporting 20+ products, search, filters, cart interactions, and complete order workflows.
- Designed MongoDB schemas and REST endpoints for products, orders, inventory, customer data, and administrative operations.
- Implemented responsive UI, validation, centralized error handling, and transactional email notifications for order lifecycle events.
- Deployed frontend and backend services with environment-based configuration and production-ready API integration.

PROJECTS

Impostor Fútbol Online Live · Source Code

Next.js · NestJS · TypeScript · Supabase

- Built a real-time multiplayer game with WebSocket lobbies, live player synchronization, voting, role assignment, and multi-round scoring.
- Structured a TypeScript monorepo with Docker Compose, Supabase Postgres/Auth, shared contracts, and a Vercel-deployed frontend.
- Added typed events, validation, and reconnect-safe room updates to keep multiplayer state consistent across active sessions.

Offerly AI Job Search Platform Source Code

React · NestJS · PostgreSQL · TypeScript

- Built React and NestJS workflows for job scoring, application tracking, resume management, and structured third-party API analysis.
- Modeled relational data in PostgreSQL and added validation, reusable service layers, and error handling across REST endpoints.
- Organized reusable modules for scoring, applications, and resumes to keep frontend and backend workflows easy to extend.

WTWR Full-Stack App

React · Express · MongoDB · JWT

- Built CRUD, likes, profiles, protected routes, and JWT authentication across a responsive React client and Express API.
- Implemented REST endpoints, request validation, centralized errors, authorization middleware, and MongoDB persistence.
- Handled duplicate records, ownership checks, session persistence, and API failures across authenticated user workflows.

EDUCATION

TripleTen Software Engineering Bootcamp

2025

Certificate in Full-Stack Software Engineering

Selected Focus: Data Structures & Algorithms · OOP · REST APIs · Databases

freeCodeCamp

2025

Responsive Web Design · JavaScript Algorithms & Data Structures
